- PP 18-013 Photometric testing
- PP 18-014 Airport FID systems
- PP 18-015 Advisory Circular ALSF- 2/ SSALR Interleaving
- PP 18-016
- PP 18-017
- PP 18-018
- PP 18-019
- PP 18-020

Please send any Airport Electrical or Operational issues to Murray Ames at murray.ames@campbellriver.ca , Matthew Levesque at Matthew_Levesque@yvr.ca , or Pierre Audette at pierre.audette@admtl.com and we will set them up as Plenary Papers for CANEW 2018 in Lethbridge Alberta. We would like to see any items related to electrical work or that affect operations on the airports. This includes anything that might help out others at airports. These can be related to any airport electrical equipment or issues from airfields to buildings to operations or anything else you can think of. You can also give us a call at the numbers below if you have any questions or ideas. You can also bring them to CANEW and we will add them there.

New ideas that you have come up with at your airport, that you are willing to share with others, or problems you have or have had which others would benefit from knowing about or may be able to help you out with would be welcome. Dealing with construction projects or issues during construction can also assist other airports or others may be able to help you with these issues.

If you can send a short write-up related to the item we will develop a 2018 Plenary Paper so the item will come forward this year for discussion. If you have pictures, short power points, or a short description we will have you present that if you are willing. The whole idea is to spark discussion during the workshop and to spread the wealth of information that is floating around the Canadian Airports. Any little tricks that you can share can really help out people at the other airports, especially the smaller ones where the electricians are on their own with no one to pass on the tricks of the trade.

Remember that the whole idea of CANEW is that it is a workshop for all to participate in, to share information, and to learn from.

Even if you will not be able to attend we are still very interested in any topics you can put forward.

LOOKING FORWARD TO MANY GOOD TOPICS THIS YEAR, SO PLEASE SEND THEM IN EARLY AS WE WANT TO GET THEM ONTO THE WEBSITE PRIOR TO THE WORKSHOP. THIS WILL GIVE PEOPLE HAVE A CHANCE TO ASSEMBLE QUESTIONS OR SOLUTIONS PRIOR TO THE WORKSHOP.

Do not forget to get your CANEW 2018 registrations and hotel bookings in early and to sign up for the “No Cost” Hands on Training Sessions this year. More info at www.canew.ca . We also have a Fun Event on Sunday September 23th if you want to take part in it.

Thanks and hoping for lots of topics,

Murray Ames – 250-923-3343 (Wed to Sat)
Matthew Levesque – 604-276-6624
Pierre Audette – 514-633-3809
